

Specification

TITLE of INVENTION: Shower Safety Ring

DETAILED DESCRIPTION: While showering elderly people can become disoriented and fall or slip and fall. By standing in the soft Shower Safety Ring a fall can be broken and help prevent injury. Handicap and others may also benefit from this device which slides horizontally or vertically. It also folds down when not in use and is out of the way.

Drawings 1 thru 5 describe the method to make the item, each drawing contains a description of the drawing.

Photo 1 shows the parts put together to better understand how it looks and can be used when mounted on the wall of the shower.
